The overall project took about 3 months to coordinate and the fish were finally stocked on 5/11/08 at 7AM. The breeder was Don Shaw, of **Highline Bass**, 585-374-5114, which is located in the Finger Lakes area of New York State. Don and his wife left around midnight, Friday, and started updating Peter Byrnes, project chairman and the awaiting club members by cell phone as they crossed over New York City onto Long Island. **Highline Bass** provided the appropriate **health certificate** for the fish so there was no major concern about transmitting disease.

Chart Guthrie Regional Fisheries Manager, NYSDEC, Region 1, provided significant guidance and approval for the project and the DEC will follow the growth of the fish through electro shocking. The fish had a non required fin removed so that they can be identified.

A total of 1500 fish in the 5.5" - 7" range were stocked. LIB paid for 80% of the stocked fish while Twin Forks contributed 20%.

The fish were extremely lively when stocked and not a single fish was lost in the tanks during the trip down from the finger lakes.
